

REMARKS

The claims in the present application have been amended in order to advance the prosecution of this case. Specifically, original claim 1 has been rewritten in clean copy as new claim 25. Original claims 2, 4, 9-11, and 13 have been cancelled. Thus, original claims 3, 5-8, 12, and 25 remain in the application.

Non-elected claims 14-24 also remain in the application. Claims 14-24 will be amended as appropriate upon favorable consideration.

The claim dependencies have been corrected in line with the claims presented for prosecution.

It is respectfully submitted that the claims, as amended, define a patentable invention over the prior art. In the case of the corresponding patent application in Korea, the feature of "a wind tunnel" recited in claim 17 has been incorporated into new claim 25 (formerly claim 1) herein.

With regard to the election requirement, a preferred species using the Korean patent version is claim 25 (formerly claim 1), which corresponds to Embodiment 6 and Fig. 8.

Should there be any outstanding matters that need to be resolved in the present application, the Examiner is respectfully requested to contact Raymond C. Stewart Reg. No. 21,066 at the telephone number of the undersigned below, to conduct an interview in an effort to expedite prosecution in connection with the present application.
